Revision 1.0

1 Environmental Duty

This policy should be read in conjunction with Sizewell C Environmental policy.

SZC Harbour Authority acknowledges that it has a general duty to exercise its functions regarding pollution control, nature conservation and other related environmental considerations, including the requirements of international and national legislation and guidance that supports and protects the marine environment. If considered necessary, the port authority may wish to seek additional powers for these purposes.

The Harbour Authority will ensure that, where required contingency plans are in place to deal with oil spills, and that local powers and procedures are sufficient to ensure any pollution incident is reported and cleared.

The SZC harbour authority will endeavour to ensure that all reporting requirements for Dangerous Substances are complied with and appropriate guidance is provided to visiting vessels to ensure that environmental best practice is followed by visiting vessels whilst using the harbour.
