Revision 1.0

1 Protection of the General Public

The Marine Safety Management System and its associated procedures enables SZC Harbour Authority to:

- Monitor the safe arrival, departure, and movement of vessels within the port.
- Protect the public from dangers arising from marine activities within the port by having processes to enable consultation (where appropriate) and promulgation of information related to safety of navigation (predominantly via Notices to Mariners and port user groups)
- Prevent acts or omissions that may cause personal injury to SZC employees or others.
