Revision 1.0

## 1 Risk Assessment Policy

This policy should be read in conjunction with Sizewell C (SZC) Risk, Internal Control, Business Continuity & Crisis Management Policy and any other associated policies and standards.

SZC Harbour Authority has undertaken a formal, documented navigational risk assessment and established systems designed to review the findings of the assessments on a regular basis or post a significant incident occurring. Additional dynamic and operation specific risk assessments will also be carried out to supplement and reinforce the application of the Marine Safety Management System and to identify any changes or enhancements that need to be further discussed and documented.

The SZC Harbour Authority acknowledges that the process of port marine safety assessment is continuous, so that new hazards and changing risks are properly identified and addressed. The SZC will supplement the continuous review process with formal reviews at suitable intervals and will, so far as is practicable, take measures to eliminate or reduce any risks identified to As Low As Reasonably Practicable through the risk assessment and review process.

An important part of the Risk Assessment process is to ensure all significant risks are discussed openly with those affected by the operation and communicated in a format that is clear, visual and easily understood. Regular reviews will also be undertaken to ensure a high level of understanding and compliance of the identified and implemented risk control measures is maintained.
