

## Sizewell C Notice to Mariners No.11 of 2025

## Scottish Power Renewables Geotechnical Survey

NOTICE IS HEREBY GIVEN: That survey operations will take place across 25 locations on the approaches to and within the Sizewell C Statutory Harbour Authority limits on or around 8<sup>th</sup> September 2025 for approximately 17-28 days, weather permitting. These operations will be conducted from the vessel Fugro Galaxy – shown in Figure 1 below.

The works comprise geotechnical investigations of the Sizewell offshore area to inform the route design and installation of the East Anglia ONE North and East Anglia TWO offshore wind farm export cables.

Drilling into the seabed will take place across 25 locations and to a depth of up to 6 metres at each location to assess the feasibility of installing windfarm export cables along this route. The survey work will be conducted aboard the *Fugro Galaxy*, a 65.2 m survey vessel. The 29 locations are shown on the annotated Chart 1543. Co-ordinates can also be seen in Table 1 overleaf.

Figure 1: Fugro Galaxy

## **Instructions to Mariners**

All vessels are requested to maintain a minimum safe distance of 500m when passing Fugro Galaxy whilst it is undertaking operations, passing at the lowest speed to avoid vessel wash effects. The vessel will maintain a continuous listening watch on VHF Channel 16.

Figure 2 shows the planned survey area where operations will be undertaken (indicated with green dots).
